

CARCANO

QUALITY AND FOOD SAFETY POLICY

Carcano Antonio S.p.A., a long-established industrial company that has been operating in the field of flexible aluminium packaging for over a century, has implemented a Quality Management System and a Food Safety Management System in order to streamline its business processes to meet customer requests in compliance with the mandatory requirements of the sector.

The Quality Management System has been implemented and certified for all Carcano Production Units in compliance with the requirements of the UNI EN ISO 9001:2015 standard.

The Food Safety Management System has been implemented for all Carcano Production Units and certified for Converting Production Units in compliance with the requirements of the FSSC 22000 standard.

Our corporate mission has been created from an entrepreneurial history spanning a hundred years, which is constantly evolving:

"To be the bravest company in our market thanks to a deep involvement that allows each of us every day to overcome the limit of our limits".

Carcano operates through the application of good manufacturing practices (GMPs) to guarantee the quality and food safety of products.

Within this context, Carcano undertakes to raise the awareness of its Suppliers so that they share compliance with the requirements of the regulations on Quality and Food Safety.

In order to guarantee high levels of corporate performance focussing on continuous improvement and in response to market developments, the Carcano Management is promoting and reviewing activities aimed at:

- analysing the requests and needs of customers in order to offer an increasingly wide range of products in line with technological evolution and sustainable development;
- meeting the needs of customers through risk analysis developed in order to prevent any danger identified in the stages of the process in terms of quality and food safety;
- increasing productivity in relation to the quality and performance needs of the product in response to customer requests and legislative requirements;
- developing, producing and supplying high-quality products and supporting customers with a reliable and professional technical service;
- guaranteeing the provision of the necessary resources and their continuous training;
- applying organisational models to guarantee Food Safety in line with its role in the food supply chain as producers of materials intended for packaging;
- reducing the number of customer complaints;
- reducing the number of complaints to Suppliers.

The Management periodically reviews its corporate Quality and Food Safety Policy in order to guarantee its adequacy over time; it ensures that it is disclosed to all staff working within the organisation or on its behalf and that it is made available to stakeholders.

The Policy is disseminated through publication on the company website and is displayed on company notice boards and in the staff training area.
